

Equip. pour mât de lignes aériennes HT 12KA/1s

Internal Reference: SOFPATL-TML/05009

Phase earthing and short-circuiting equipment for high-voltage overhead lines. Its main purpose is to protect workers against accidental switching on or voltage recurrence during repair work.

Complies with IEC 61230 standard.

Consists of:

3 aluminum-alloy TML clamps with clamping screws for cylindrical conductors with diameters ranging from 10 to 70 mm.
3 copper cables with PVC insulation. Cross-section and length according to model.
3 TT-50 grounding clamps.
3 covers for transport and storage of equipment.
